Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To outperform the S&P/ASX Small Ordinaries Total Return index by 3-5% over rolling five-year periods before fees and taxes.

Investment strategy

OC take a stock-specific, bottom-up approach to investment and do not have a particular style bias investing in stocks based on value, growth, yield or combination thereof. OC focuses on smaller businesses (ex ASX100) believing they are easier to understand, simpler to value and accessible to research. OC also believe small companies are often better placed than large companies to capitalise on significant growth in niche sectors, with strong management teams and well-resourced specialist staff.
